

The IICL would like to recognize and thank EUCORE for facilitating and supporting the recent IICL training course event in Antwerp, Belgium. The IICL has been setting standards for over 50 years as well as promoting training and education in the container industry. The support of depots is a very important element to our courses and hands-on practice.

Thanks to EUCORE and its team, for working with the IICL to make these events happen. Your efforts and unwavering support are very much appreciated.
